

Assignment – Persona Development (2 Days)

Module: Human Computer Interaction / UI-UX Design

Assignment Description

Students are required to develop detailed user personas for a selected application domain. The assignment focuses on understanding target users, their behaviors, motivations, and challenges.

What You Must Do

- Select a suitable application domain (e.g., e-commerce, education platform, mobile app, etc.).
- Identify and define at least three realistic user personas.
- Include demographic details, goals, motivations, frustrations, and behavior patterns.
- Provide a short background story for each persona.
- Ensure personas are practical and related to the selected domain.

Expected Submission

- Clear and well-structured persona profiles.
- Professional formatting and presentation.
- Logical connection between personas and application context.
- Original content with proper documentation format.

Evaluation Criteria

- Relevance and realism of personas.
- Depth of user understanding.
- Clarity and organization.
- Overall presentation quality.
